

AMENDMENTS TO THE SPECIFICATION

Please amend the last paragraph that starts on p. 7 of the originally filed specification as follows:

In some advantageous embodiments, when the user wishes to sign up for new service or modify an existing service, the intranet server 30 authenticates the user (via the screen display of FIG. 2 for example) and provides the user with [[a]] an interactive screen display/control panel that allows the user to access configuration parameters for a particular application program. One example of such an interactive screen display is illustrated in FIG. 3. In this embodiment, the user is presented with a number of modifiable text boxes that describe aspects of the configuration of the user's web site or other network resource.
